

Mefo Off Road Mousse

MEFO Sport is proud to introduce a new innovative and quality approach to Mousse manufacturing.

As a result of over 5 years development based upon extreme point and side loads occurring in Motocross Side Car sports which have taken us to extremes of weighted load onto our new Mefo Mousse. (in Side Car use this is practically double the weighted load and stresses generated by a solo machine). Together with parallel development in Motocross and Enduro Markets.

For the first time at Rally Dakar 2009 in South America, where our Mefo Off Road Mousse had its first baptism of fire with Daniel Willemssen the 5-times Side Car Cross world champion riding a Yamaha Tenere/Rallye has shown sweeping success with excellent durability results.

With Research, Development and Manufacturing in house at Mefo Germany, our company enhancement and innovative quality approach, we are working toward presenting further innovative products in the near future

Also available for:
12"-14" F+R
17"-19"
for 65 cc / 85 cc
Supermini Class &
Schoolboy Moto X
